Patent Term Extended Under 35 U.S.C. § 156

A certificate extending the term of the following patent was issued on April 4, 1997.

U.S. Patent No. 4,839,342; Granted June 13, 1989, to Renee Kaswan; Owner of Record: University of Georgia Research Foundation, Inc.; Title: Method of Increasing Tear Production by Topical Administration of Cyclosporin; Classification: 514/256; Product Trade Name: OPTIMMUNE®; Original Expiration Date: September 2, 2007; Term Extended: 700 days; Extended Expiration Date: August 2, 2009.

Interim Treatment of Fee Deficiency Submissions under 37 C.F.R. § 1.28(c) in view of *DH Technology*

Two recent district court decisions have considered the practice of submitting a fee deficiency under 37 C.F.R. § 1.28(c) and have reached conflicting conclusions. *See DH Technology v. Synergstex International, Inc.*, 937 F.Supp. 902, 40 USPQ2d 1754 (N.D. Cal. 1996); and *Jewish Hospital of St. Louis v. Idexx Laboratories*, 951 F.Supp 1 (D. Me. 1996).

In *DH Technology*, the District Court for the Northern District of California held that the submission of the balance of the full issue fee under 37 C.F.R. § 1.28(c) must also meet the requirements of 37 C.F.R. § 1.317. 937 F.Supp. at 909, 40 USPQ2d at 1761. *DH Technology* is currently under appeal to the Court of Appeals for the Federal Circuit (Federal Circuit).

Since a decision by the Federal Circuit in *DH Technology* is expected to resolve the conflict concerning 37 C.F.R. § 1.28(c), the PTO is holding the acceptance of all submissions of fee deficiencies under 37 C.F.R. § 1.28(c) in abeyance pending a decision in *DH Technology* by the Federal Circuit.

Inquiries with regard to this notice should be directed to Robert W. Bahr at (703) 305-9285.

Reference Collections of U.S. Patents and Trademarks Available for Public Use in Patent and Trademark Depository Libraries

The following libraries, designated as Patent and Trademark Depository Libraries (PTDLs), receive patent and trademark information in various formats from the U.S. Patent and Trademark Office. Many PTDLs have on file all full-text patents issued since 1790, trademarks published since 1872, and select collections of foreign patents. All PTDLs have both the patent and trademark sections of the *Official Gazette of the U.S. Patent and Trademark Office*. The full-text utility and design patents are distributed numerically on 16 mm microfilm, and plant patents on color microfiche. Patent and trademark search systems on CD-ROM (Compact Disc-Read Only) format are available at all PTDLs to increase utilization of and enhance access to the information found in patents and trademarks. It is through the CD-ROM systems that preliminary patent and trademark searches can be conducted through the numerically arranged collections.

All information is available for use by the public free of charge.

In addition, each PTDL offers reference publications which outline and provide access to the patent and trademark classification systems, as well as other documents and publications which supplement the basic search tools. PTDLs provide technical staff assistance in using all materials. Facilities for making paper copies of patent and trademark information are generally provided for a fee.

Since there are variations in the scope of patent and trademark collections among the PTDLs, and their hours of service to the public vary, anyone contemplating use of these collections at a particular library is urged to contact that library in advance about its collections, services, and hours in order to avert possible inconvenience.

*A communication from the examiner should have been received in most applications filed prior to this date.

Patents will Expire as Follows:
(1) The term of any utility or plant patent that is in force on or results from an application filed before June 8, 1995 is the greater of the 20 year term provided in 35 U.S.C. 154(a)(2) or 17 years from grant subject to any terminal disclaimers. 35 U.S.C. 154(c)(1).
(2) All utility and plant patents granted on applications having an actual United States filing date on or after June 8, 1995 are granted for a term which begins on the date on which the patent is granted and ends 20 years from the date on which the application was filed in the United States. If the application contains a specific reference to an earlier application under 35 U.S.C. 120, 121 or 365(c), the patent term ends twenty years from that date on which the earliest application was filed. 35 U.S.C. 154(a)(2).
(3) All design patents are granted for a term of 14 years from the date of the grant.
However, the term of any patent may have been curtailed by disclaimer under the provisions of 35 U.S.C. 153, have lapsed due to failure to pay maintenance fees, or have been extended under the provisions of 35 U.S.C. 154, 155, or 156. Thus, if more reliable information is needed with respect to a particular patent, then the specific patent file should be reviewed to determine the actual date of patent expiration.

MARKS PUBLISHED FOR OPPOSITION

The following marks are published in compliance with section 12(a) of the Trademark Act of 1946. Applications for the registration of marks in more than one class have been filed as provided in section 30 of said act as amended by Public Law 772, 87th Congress, approved Oct. 9, 1962, 76 Stat. 769. Opposition under section 13 may be filed within thirty days of the date of this publication. See rules 2.101 to 2.105.

A separate fee of two hundred dollars for opposing each mark in each class must accompany the opposition.

SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

SECTION 2.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).
